

ELEPHANT PEPPER CAMP
MASAI MARA

—
KENYA

Elephant Pepper Camp

Experience: One of Kenya's original, very small and exclusive tented camps, located away from other lodges in the pristine Mara North Conservancy. Elephant Pepper Camp maintains a rustic luxury and authenticity of a traditional safari from yesteryear; **Exclusivity:** Elephant Pepper guests have this outstanding part of the Masai Mara, almost to themselves, with game driving restricted to vehicles belonging to lodges within the conservancy; **Explore:** From fiercely contested croquet matches in the lazy afternoons, to walks identifying tracks, to learning to use a handmade bow and arrow; **The Great Migration:** access the excitement of the Migration and its river crossings by spending a day in the reserve with a picnic lunch.

Special Features In The Area

- ◆ Elephant Pepper Camp is in the heart of the Masai Mara prime game viewing area. It is only half an hour leisurely game drive from the Mara River migration crossing, although most game viewing is conducted in the Mara North Conservancy core, right around camp.
- ◆ The grass around the camp is very high in salts, especially near the honeymoon tent where there are natural springs in the wetter times, so this attracts a lot of elephant that are free to roam around the camp at night time.
- ◆ The camp overlooks the vast open plains, teeming with game, especially during the migration.
- ◆ Here you experience the bush as one should: it is a personal experience with a very homely atmosphere, where we all eat together and share the beauty of the surroundings while relaxing around the campfire.
