Sustainable by design

Responsible travel and impactful experiences go hand-in-hand at &Beyond Sossusvlei Desert Lodge where elegant, mindful design meets innate, sustainable habits in support of uncompromised luxury.

SUSTAINABLE LUXURY

Each guest Suite boasts:

- An ingenious roof design providing optimal shade plus maximum space for unobtrusive solar panels
- A fully independent solar hot water system
- A highly effective grey water recycling system per Suite (powered by the solar panels on the roof)
- A rainwater harvesting tank (also powered by the solar panels on the roof)
- A pool cover to be used as an evaporation control measure (when guest Suites are not in use)

POWERED FOR GOOD

- All Suites are beautifully cool, thanks to the air conditioning which is powered by solar energy
- Each Suite boasts an inviting private plunge pool. The water recycling system throughout the lodge generates more than 100 000 litres of grey water a month, which more than offsets the evaporation from the pool surfaces
- Each Suite's private outdoor rain shower, offering 180° views, is sustainably supported by the lodge's water recycling systems
- Room-freezer treats of ice-creams, desert cordials, and craft beer – another solar-powered benefit
- Privacy and extra shade, courtesy of the indigenous desert gardens being cultivated around the Suites, are irrigated by the harvested rain water and recycled grey water systems

NATURALLY IMPACTFUL

- By bottling water on site and using recycled glass bottles, the lodge saves a significant amount of CO² per month, absorbing the carbon footprint of the plastic water delivery truck
- All cleaning products used at the lodge are environmentally friendly and 100% biodegradable
- All energy used at the lodge is stringently tracked and reported on a monthly and quarterly basis - this includes the use of wood, petrol, diesel, electricity, gas and paraffin
- In an effort to constantly conserve water, all guest Suites are designed without baths and all systems are regularly checked for leaks and water usage strictly monitored
- The lodge undergoes an annual sustainability audit to determine its environmental impact by monitoring and actively reporting on its carbon footprint
