Why stay?

1 EXCLUSIVE AND EXCEPTIONAL YEAR-ROUND GAME VIEWING

Perhaps one of the Serengeti's best-kept secrets, wildlife lovers can enjoy their own private Serengeti in the western parts of the park. Remotely situated with far fewer crowds and vehicles, enjoy having the game-rich plains to yourself. Witness large resident prides of lion and an abundance of predators, hyena clans, buffalo, elephant, hippo and herds of plains game. This secluded area also has an annual topi migration, and the spectacular black-and-white colobus monkeys found nowhere else in the Serengeti.

2 MAGNIFICENT LION SIGHTINGS

Apart from its spectacular natural setting, this part of the Serengeti is known for its big lion prides. There are four resident prides in the area, consisting of between 20 and up to 60 lions. Our team on the ground continuously monitor the lion numbers, and you are assured excellent sightings. Not only are the opportunities for seeing lion a given, but you will more often than not find yourself viewing alone with ample time, as other vehicles are few and far between.

3 SITUATED ON THE BANKS OF A RIVER

The lodge is set in the remote western reaches of the park on a tributary of the Grumeti River. The permanent waters of the Grumeti and seasonal Mbalageti rivers attract an abundance of wildlife. Resident hippo grunt in the tranquil pools in front of the lodge while crocodiles lie, log-like, in the shallows. Meals can be enjoyed on the extensive deck with beautiful river views, while the dining area opens up to a traditional African boma, where dinner is served beneath a billion stars.

4 SUSTAINABLE DESIGN EDGED WITH LUXURY

Using the river's natural bow shape while paying homage to the circular forms of a traditional Masai Manyatta, the cultural homesteads of the Maasai people, the lodge unfolds to reveal an understated sense of luxury entrenched in sustainability. Touching the earth lightly and seemingly floating across the landscape, 10 nostalgically elegant, and very spacious, guest Suites await. Expect the ultimate in exclusivity, taking only beautiful memories home and leaving little to no footprint behind.

Great Wildebeest Migration (cont.)

DISCOVER THE SERENGETI

Great Wildebeest Migration

1 ONE OF THE 7 NATURAL WONDERS OF THE WORLD

Considered the most thrilling spectacle in the animal kingdom, this epic journey migrates from Tanzania's Serengeti to Kenya's Masai Mara.

2 THE WORLD'S LARGEST OVERLAND MAMMAL MIGRATION

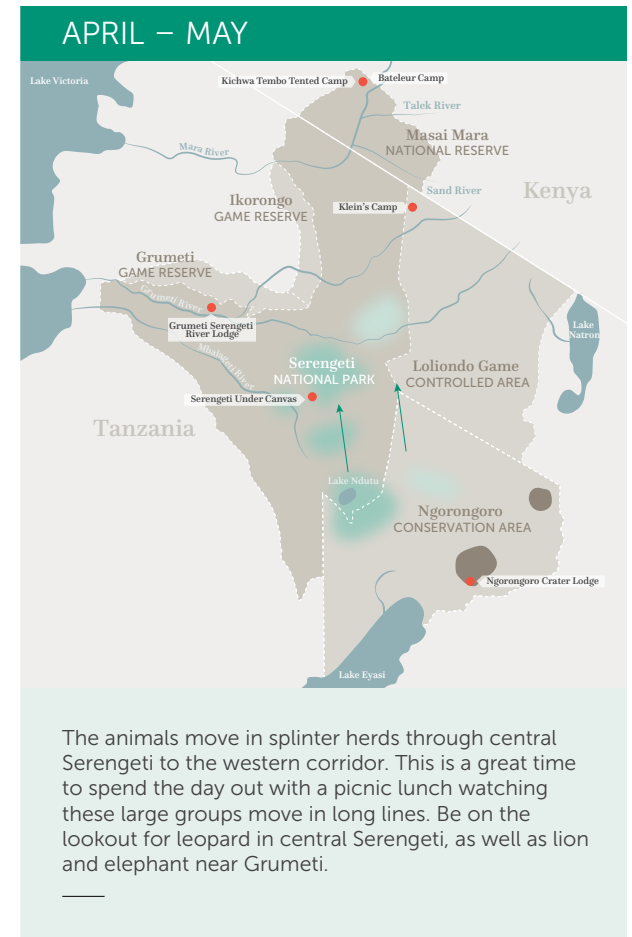

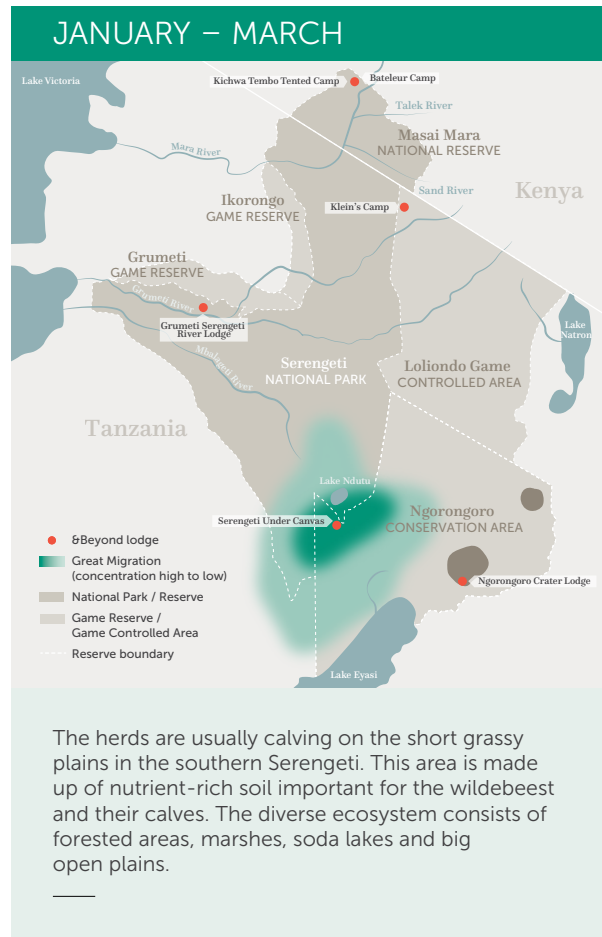

The annual movement of wildebeest and other herbivores across the Serengeti-Mara ecosystem consists of more than 1.5 million wildebeest, 500 000 zebra, 200 000 Thompson's gazelle and 18 000 eland.

3 THE ANIMALS MIGRATE OVER 800 KM (500 MI)

Due to the sheer size of the herd, the animals have to move to be able to survive. The herds generally follow the rain, as where there is rain, there is fresh grass. Once grass is depleted in one area, they will move to another grassy area.

It's estimated 500 000 wildebeest calves are born annually.

The annual movement of wildebeest and other herbivores across the Serengeti-Mara ecosystem is rarely the same in terms of precise timing and direction.
