- ◆ Visit to Lewa HQ to see the sniffer dogs
- ◆ School visit - normal term times and extra cost
- ◆ Horse riding for older experienced riders
- ◆ Camel riding for older children
- ◆ Children's menu

Special Features In The Area

- ◆ Lewa holds over 10% of Kenya's black rhino population and about 15% of Kenya's white rhino population.
- ◆ It holds the largest single population of critically-endangered Grevy's zebra.
- ◆ As well as being renowned for its rhinos and grevy's zebra, Lewa hosts an abundance of other species, including elephant, lion, cheetah, leopard and buffalo.
- ◆ There is an archaeological site on Lewa, which is rich in tools used by prehistoric man. It is thought the site was an "artisan's shop", where the tools were made, as there are so many that a site for domestic use is unlikely. The Museums of Kenya (where the pre-history department was made famous by the Leakey family), have shared their findings of the site with the guides on Lewa.
