OVERVIEW

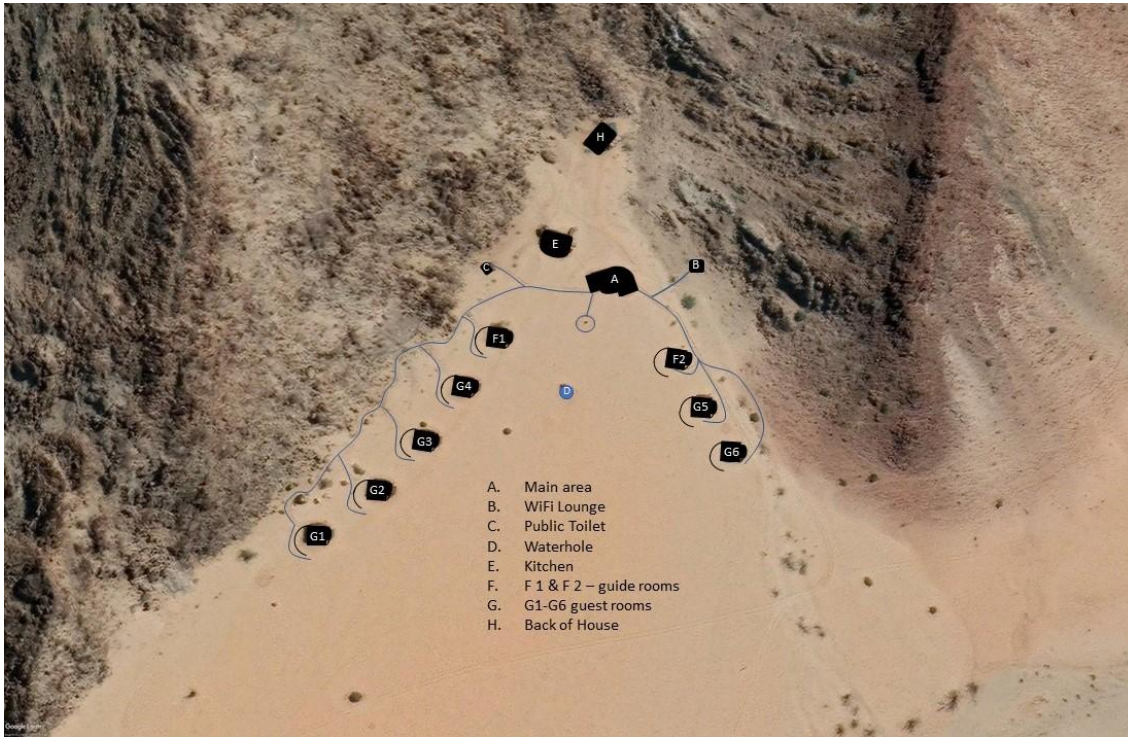

Camp Sossus emphasises every aspect of our intention to redefine immersive exploration and luxury. Our own definition of this encompasses privacy, intimacy, experiential focus and total flexibility, all whilst being perfectly comfortable. The camp offers just six tented guest rooms and is open year-round, providing a great alternative to any traditional lodge or camp in the Sossusvlei area, whilst offering unparalleled opportunities for immersive exploration of the Namib Desert environment. The large west-facing windows and south-facing doors in the tented guest rooms allow natural cooling by the predominant afternoon south westerly wind, and the tents all have a basic infrastructure that offers important comforts. These include semi open-air en suite bathrooms with flush toilets and hot bucket showers with locally sourced amenities, comfortable extra-length three-quarter twin beds, solar lighting, 220V electrical charging station, pedestal fan, shaded patio, shaded day-bed and a magnificent star bed. The essence of the camp therefore remains both experiential and immersive.
