

BIYELA
LODGE

Biyela Lodge is built into the hillside of this piece of untouched mFulaWozi Wilderness, perfectly positioned to maximise the sweeping views of the imposing flood plains of the White iMfolozi River below. The lodge having been built by members of the Biyela clan, stone by stone is surprisingly modern, contemporary and unpretentious. It is an oasis of privacy and eco-luxury, and the suites are styled on a modern apothecary theme that is consistently referenced in the furniture and selected materials which is a dynamic reflection of the fusion of modern and an expression of the environs.
