

DISCOVER SEGERA'S FAMILY EXPERIENCES

We love hosting families in our malaria-free, moderate climate. Segera is the perfect base for families with children, thanks to our welcoming staff and local hosts who will enrich your family safari with many magical Kenyan memories. Segera has five incredibly family-friendly accommodation options - the Family Villa, Garden House, Greenhouse, Farmhouse and Segera House, along with private game vehicles, dedicated villa attendants and bespoke menus so you can relax and have the holiday of a lifetime.

YOUNG CONSERVATIONIST | FARM LIFE | CATTLE COWBOY | CRAFTS | SPORTS | FISHING | PHOTOGRAPHY | SLEEP-OUTS

EXPERIENCES

Located in a non-malarial area and with a year-round moderate climate, Segera is the ideal family safari destination in any season. With chefs who can cater to the needs of children and infants and experienced staff available to babysit any time (including afternoon nap times or evenings), parents can enjoy time off, knowing that their kids are in the safest of hands - as well as sharing precious moments as a family.

While experiencing day-to-day safari life on Segera, you and your children will also be able to interact with the surrounding local communities. Our activities are designed to offer a holistic, educational and fun experience for children, including playful ways to help children think more about energy (as generated by our solar farm) and to learn about where water comes from and why it's so important, as well as gaining insights into local cultures through creative arts and crafts. A child-focused "Behind the Scenes Tour" can help foster greater awareness of nature and the environmental challenges we face both in Laikipia and globally. All these activities will also allow parents to find private time for quiet wellness moments, such as walks, game drives and romantic dinners under the magical African sky.

In keeping with the diverse range of conservation and sustainability projects being undertaken at Segera, we have created a range of themed kids' activities to reflect the many facets of life at the Retreat, with children being able to learn more about sustainability and safeguarding Africa's future in the long run, whilst still having a lot of safari fun.

EXPERIENCES

YOUNG CONSERVATIONIST | Interactive game drives with wildlife and bird checklists allow children to discover the diverse species found on Segera while gaining insights into conservation practices. Led by Segera's expert guides, they can learn about wildlife tracking using animal tracks and droppings, fostering a deeper connection with nature. They can also join in on grooming our canine unit during the dog's Sunday spa days. A visit to our tree nursery is yet another opportunity for them to plant a tree and actively participate in our Tree of Life reforestation initiative.

FARM LIFE | Learning about wellness and nutrition, and where our food comes from: Children can interact with our team planting seeds in the herb and vegetable gardens, helping to water and harvest fresh vegetables and learning how to prepare a healthy nutritious meal for their parents or friends. They can also help the chefs prepare scrumptious dishes using all the ingredients found on Segera. They can have fun feeding our free-range chickens, collecting fresh eggs for the Kitchen and learning about the traditional techniques that go into the making of Segera honey.

Of course, farm life is not all work, and what better way to take a break than with an al fresco riverside picnic? It's heavenly for both kids and families.

EXPERIENCES

CATTLE COWBOY | The “Wild West” , Kenyan style. Visit a real-life cattle dip to watch Segera’s professional herders keep the herd together and provide helpful (but safe) support during dipping. Or why not learn how to milk a cow when visiting one of Segera’s cattle bomas?

ARTS & CRAFTS | Inspiration from Nature combined with Kenya’s rich cultural heritage. Budding young artists can take a “kids’ tour” of the contemporary art gallery and sculpture garden to learn about Segera’s Art collection from Africa and then create their own artworks. Children are given water-colour materials to encourage their creative flare, with flowers and colourful scenery to paint in the botanical garden, along with landscapes and animals. They can learn traditional Kenyan beading techniques from the Samburu, Turkana and Borana women who have come together to form the SATUBO beading workshop (supported by the ZEITZ foundation), make their own beaded bracelets to take home or even learn how to make a traditional bow and arrow.

SPORTS | Energetic activities such as playing soccer with the Segera FC Team, playing volleyball or table tennis and supervised swimming in Segera’s saltwater pools can easily be arranged. They can also participate in the “Rhino Run” – a unique opportunity to run around the ‘Tree of Life’ rhino-shaped forest, amidst the wild beauty of Segera.

FISHING | Segera’s professional guides can take children fishing at the Sugeroi River, with simple-to-use fishing rods and nets for catching delicious freshwater crayfish.

EXPERIENCES

COMMUNITY | Community visits and engaging with pupils from the local schools supported by ZEITZ foundation is a great way to learn about the communities' ways of life, their culture and well as meeting Kenyan pupils who are thriving through education.

PHOTO STORIES | Children can capture their safari experience and adventures from their own perspective on camera, enabling them to treasure and relive their memories back home.

SLEEPING UNDER THE STARS | Why not enjoy a unique opportunity for kids to safely sleep out under the African stars, to get a real “bush” experience and hear the sounds of the wilderness from the sanctuary of their outdoor bed? Young adventurers will, of course, always have the option to climb back into their nearby real beds if they choose.

Our dedicated Guest Relations team looks forward to caring for your children throughout your Segera safari, with all activities planned and personalised to suit your preferences and needs.
