

Legendary Expeditions

The *sky* is the limit

*Let our private helicopter take
your safari to new heights*

Private helicopter excursions

Soar through the Tanzanian skies, soaking up the incredible vistas as the sprawling northern Tanzanian landscape unfolds below you. Unlocking otherwise unreachable destinations, our unforgettable helicopter journeys include:

A SHORT TRIP SKYWARD | 30 minutes

Set off from Mwiba, soaring over sprawling forests of Myrrh trees (Commiphora) and out over the escarpment before setting down at its highest point. Enjoy a morning coffee or sunset drinks as you gaze out over Lake Eyasi before returning to the lodge.

LAKE EYASI | 1.5 hours

Take to the skies to soak up the stunning vistas of Lake Eyasi and the cascading escarpment, with your pilot cruising at a low altitude for optimal viewing. Birdlife is abundant all year round, with optimal birding in November and December. End the experience in style as the pilot lands at the highest point of the escarpment for a light picnic or sundowner.

SOUTHERN SERENGETI | 2.5 hours

Experience a sky safari as you search for wildlife from above, taking in the vast landscapes of the southern Serengeti as you go. Your pilot will then land the helicopter in a scenic spot for refreshments and a moment to marvel over the endless plains. Next, fly out over Lake Eyasi and land on the escarpment's highest point for a light picnic or sundowner.

YAEDA VALLEY | 2.5 hours

This excursion puts the region's dramatic scenery center stage. It starts with an early departure across Mwiba's rolling Commiphora forests and out over the Eyasi escarpment before arriving at the Yaeda Valley. After a picnic breakfast, spend the morning exploring the ancient, baobab-dotted landscape before returning for lunch at the lodge via the region's waterfalls and gorges.

GREAT RIFT VALLEY | 3.5 hours

After an early breakfast, depart on an incredible flight over the Great Rift Valley that includes a light picnic and coffee stops along the way. See the flamingos at Lake Natron, Ol Doinyo Lengai (an active volcano), and abundant waterfalls before turning south across the Ngorongoro highlands. Your pilot will fly down towards Lake Eyasi with one final stop for photos and a glass of Champagne before returning for lunch.
