Located in Southern Africa, in the North West of Zimbabwe and nestled within a private concession along the banks of the Zambezi River, Mana Sands offers a truly unique way to connect with nature.

Mana Sands falls within the greater Mana Pools area which is a UNESCO World Heritage Site.

An aerial photograph of a wide, winding river at sunset. The sun is a bright, glowing orb in the upper right corner, casting a long, shimmering reflection across the water's surface. The sky is a gradient of warm colors, from deep orange near the horizon to a lighter, hazy yellow at the top. The river flows from the background towards the foreground, with several small, sandy islands and peninsulas scattered throughout. The central island is prominent, featuring a small cluster of trees and some low-lying vegetation. The water's surface is textured with ripples and reflects the golden light of the setting sun. The overall atmosphere is serene and majestic.
