Recognised historically as one of the best locations in the Serengeti, Explorer has reimagined and created an upscale contemporary safari lodge in which the expression of space and freedom meets that of the great outdoors.

At Serengeti Explorer relaxation, meditation and adventure are all present in equal measure. Under the careful stewardship of Elewana's service standards, Explorer has crafted a series of inspired opportunities that will allow the modern safari traveller to experience the wilderness in a more contextual way.

OUR SERENGETI HOME

One of the greatest natural spectacles on Earth passes directly in front of Serengeti Explorer. An ideal location - aided by its elevated aspect - makes this Lodge the perfect vantage point to view & explore this natural wonder of the world.

This reimagined lodge sits high up on the Nyaboro Hills overlooking the endless plains for which the Serengeti is famed.

It is one of the most central yet private settings in the Serengeti, the perfect place to see and access the Great Migration as it makes its annual pilgrimage.

PEOPLE - PLANET - PARTNERSHIPS

Sustainable construction and community empowerment were the guiding principles behind the design of this luxury lodge.

Re-purposed stones & materials from the demolition of the existing structure were used to create the dry-stack external walls and room floors, whilst reintroducing local build methods and honing community skills. Decorative items and lighting fixtures have been manufactured using recycled materials by our social enterprise, Shanga.

The lodge will also support a number of conservation and community initiatives in the region through our philanthropic arm, Land & Life.
