SHARK CAGE DIVING

South Africa was the first country to protect the great white shark in 1991.

The result of the protection is that of the cage diving industry.

In 1998, the Bill to re-open great white sharks to commercial fishing was tabled, and the government decided to dismiss the application and collect revenue from cage diving.

At the moment there are 12 licensed cage diving operators in South Africa.

To save these apex predators from human slaughter, a solution is to make these legendary creatures a living resource (worth more alive than dead).

Gansbaai's cage diving industry is the biggest success story for white shark conservation worldwide, resulting in numerous other shark diving businesses arising from the success story of Gansbaai.
