PANGOLIN TRACKING on foot: (Specialized Activity) – exclusive for guests staying 2 nights
The choice of going with the researcher or guide, will be determined by circumstances, weather and operations. Sightings are not guaranteed, as this complex, vulnerable species needs a gentle and respectful approach. Tracking on foot will be done in silence and maintaining a discreet distance. The Pangolin tracking is a specialized night/day (seasonal) activity. During the summer months this activity tends to take place between 10pm and 6am and during the winter months from 5pm to 11pm. As this would be the most active period of the day for these mostly nocturnal animals. You will join a guide and tracker on a walking trail in the dark within the 20 000ha Okonjima Nature Reserve. We limit participation to a max of 6 people per pangolin tracking. This gives the client insight into this secret life of the very endangered Ground Pangolin. A flashlight and walking shoes are compulsory. This activity is reserved for guests that are staying for a minimum of 2 nights with us.

NIGHT DRIVE: - subject to weather and availability, incl. in Fully Inclusive rate
Guests are invited on a nocturnal game drive, led by our knowledgeable guides. This evening drive in the Okonjima Nature Reserve allows guests a chance to spot the many nocturnal game species they wouldn't normally see during the day. After the sun has set and the temperatures have dropped, the African bush comes to life once again: bat-eared foxes roam about, aardwolf on the hunt for insects, owls observe their surroundings from a height. All Okonjima guests are welcome to join a nocturnal drive. The Nocturnal Game can only be booked directly at the Lodge.
