

Your Private Safari Vehicle

On safari, your vehicle is much more than transportation—it becomes your front-row seat to the wilderness. Throughout your private safari, you'll travel in a specially equipped 4x4 safari vehicle with a dedicated professional guide, allowing you to experience each day at a pace shaped around your interests.

Unlike a shared safari, a private vehicle provides greater flexibility to linger at exceptional wildlife sightings, focus on photography, and adjust the rhythm of the day whenever conditions and park regulations allow.

The illustration below provides an example of a typical safari vehicle configuration.

INTERIOR LAYOUT

Spacious. Comfortable. Designed for the Best Views.

YOUR PRIVATE SAFARI VEHICLE

Every detail is designed for comfort, flexibility, and an exceptional safari experience.

-  **WINDOW SEAT FOR EVERY GUEST**
Guaranteed window seating for all passengers ensures unobstructed wildlife viewing and photography.
-  **POP-UP ROOF**
Stand comfortably to enjoy panoramic views and capture the perfect shot.
-  **LUGGAGE STORAGE**
Ample space for large suitcases, soft bags, and camera equipment.
-  **REFRESHMENTS ON BOARD**
Chilled water and non-alcoholic beverages available while on game drives.

THE CURAH ADVANTAGE

With your own private vehicle and dedicated guide, each day is shaped around your interests, wildlife sightings, and the rhythm of the land.

Your safari. Your pace. Your experience.

The Advantage of a Private Safari

With your own vehicle and dedicated guide, there is no need to coordinate your game drives around travelers outside your party. Whether you want to spend extra time observing a pride of lions, wait for the perfect photograph, or simply enjoy the landscape at a more relaxed pace, your safari can be tailored more closely to your interests.

Safari vehicles and exact configurations may vary by destination, operator, and group size. The illustration above is representative of a typical private safari vehicle and is intended to provide a general overview of the onboard layout and features.

In Tanzania, you will be using the standard closed safari vehicle used in the parks you're visiting.
